

## GCD

GCD stands for Gratest Common Divisor. Another name for GCD is HCF (Highest Common Factor). We are given two integer number. The GCD of two number will be that number which can divide both the number without a remainder. But there may be many of the numbers which can divide both. So GCD will be that one of them which will be highest.

Input : Two Integers

Output : Single integer which will be GCD
